Go authentic for your motorcycle

To ensure the maximum life, quality and proper maintenance of Yamaha motorcycles, always use genuine parts. Using imitation or copy parts can negatively affect the machine's fuel economy, running performance, riding comfort, durability, etc., and can lead to poorer overall machine performance.

"Yamalube" is a product developed especially for motorcycles with ingredients to provide maximum lubrication function based on extensive research and development. It is an optimum mix of high-grade mineral oil and synthetic additives that has passed stringent tests to prove its effectiveness. It has excellent fluidity at low temperatures, and reduced friction and resistance to agitation so it contributes to easier starting that in turn reduces the load on the battery. At high temperatures, it keeps excellent oil coating performance to keep the engine running reliably.

Always remember to review your YAMAHA owner's manual. Always ride in a responsible manner, respecting the environment as well as national and local laws. Keep it well-maintained and always outfitted in accordance with national and local laws. Always wear an approved helmet, eye protection, long-sleeved shirt, long pants, gloves and boots. Yamaha reserves the right to change specifications without notice. Specifications and measurements are approximations and subject to variance. For details, confirm with your dealer before purchase. The riders shown in this brochure are highly skilled in a closed area riding.
